Research area. Computational social choice: algorithms, data, and experimental methodology for collective decision-making; maps of elections; participatory budgeting; social choice with language models.

Academic Positions

2026 – now
Postdoctoral Researcher, University of Geneva
NLP pipelines for diplomatic and policy texts; computational models of decision-making in multilateral negotiations; LLM-based simulation of democratic deliberation.

2024 – 2026
CNRS Postdoctoral Researcher, LAMSADE, Université Paris Dauphine-PSL
Host: Jérôme Lang. Independent research at the intersection of social choice and machine learning; discovering hidden structure in preference data.

2021 – 2024
Research Assistant, AGH University of Kraków
ERC-funded project led by Piotr Faliszewski. Maps of elections, participatory budgeting, development of `prefsampling`.

2018 – 2021
Teaching and Research Assistant, Jagiellonian University, Kraków
Taught exercise sessions in three bachelor courses; co-founded Pabulib.

Education

2017 – 2023
PhD in Computer Science, Jagiellonian University
Thesis: *Map of Elections*. Advisor: Piotr Faliszewski. Defended with distinction at AGH on 13 May 2024.

2015 – 2017
MSc in Computer Science, Jagiellonian University

2012 – 2015
BSc in Computer Science, Jagiellonian University

Awards, Fellowships, and Grants

2025
Polish Prime Minister's Award
For an outstanding doctoral dissertation (*Map of Elections*).

2023
Pragnesh Jay Modi Best Student Paper Award, AAMAS-2023
For *A Map of Diverse Synthetic Stable Roommates Instances*, with N. Boehmer and K. Heeger.

2023
START Fellowship, Foundation for Polish Science
Awarded to the most promising young scientists in Poland.

2018
Principal Investigator, NCN Preludium grant, National Science Centre, Poland
Project: *Election Isomorphism Problem*. The project that started maps of elections.

Publications

5 journal articles (*Artificial Intelligence*, *JAIR* ×2, *JCSS*, *Theory and Decision*) and 28 full conference papers (IJCAI ×11, AAMAS ×7, AAAI ×5, NeurIPS ×2, ECAI ×2, EMNLP ×1). Citations: TODO; *h*-index: TODO (Google Scholar, October 2026). The full list is provided as a separate document, with the same labels as below. Selected papers:

[J4] **S. Szufa**, N. Boehmer, R. Bredereck, P. Faliszewski, R. Niedermeier, P. Skowron, A. Slinko, N. Talmon. Drawing a Map of Elections. *Artificial Intelligence* 343, 2025.

[C3] **S. Szufa**, P. Faliszewski, P. Skowron, A. Slinko, N. Talmon. Drawing a Map of Elections in the Space of Statistical Cultures. *AAMAS-2020*.

[C7] **S. Szufa**, P. Faliszewski, Ł. Janeczko, M. Lackner, A. Slinko, K. Sornat, N. Talmon. How to Sample Approval Elections? *IJCAI-2022*.

[C11] P. Faliszewski, J. Flis, D. Peters, G. Pierczyński, P. Skowron, D. Stolicki, **S. Szufa**, N. Talmon. Participatory Budgeting: Data, Tools and Analysis. *IJCAI-2023*.

[J1] N. Boehmer, K. Heeger, **S. Szufa**. A Map of Diverse Synthetic Stable Matching Instances. *JAIR* 79, 2024 (AAMAS-2023 Best Student Paper Award).

[C28] R. Faulkner, **S. Szufa**, D. Hoyer, T. J. Zhang, R. Bouffanais, J. Z. Leibo, Z. Jin. Simulating Democratic Deliberation: Representing Pluralistic Preferences through Electoral Systems in Multi-Agent LLMs. *EMNLP-2026*, to appear.

Authors in computational social choice are usually listed alphabetically; the first three papers above list me first as lead author.

Software and Datasets

2020 – now **Pabulib**, pabulib.org
Co-founder and lead maintainer. The largest open library of participatory budgeting data: 2,053 elections from 30 cities in 8 countries, 8.6 million votes; used in more than 70 papers.

prefsampling, Python library
Author. Sampling synthetic preference data under a wide range of statistical cultures; a standard benchmarking tool in computational social choice.

mapel, Python library
Author. Computing distances between elections and drawing maps of elections.

Teaching and Supervision

2018 – 2021 **Exercise sessions**, Jagiellonian University
Introduction to Programming, *Logic and Set Theory*, *Linear Algebra* (bachelor level).

Tutorial: Numerical Experiments in Computational Social Choice
Given at AAAI, AAMAS, and IJCAI.

2021 – now **Co-supervision**, AGH University, LAMSADE
More than ten bachelor's and master's students, several of them coauthors of published papers.

Service and Leadership

2026 – now **Editorial board member**, Journal of Artificial Intelligence Research (JAIR)

Program committee member, NeurIPS, AAAI, AAMAS, IJCAI

Journal reviewer, JCSS, Theoretical Computer Science, Social Choice and Welfare

2025 – now **Co-founder**, Nauka dla Demokracji (Science for Democracy)
Nonprofit connecting researchers with the officials who run democratic processes; helps municipalities adopt the Method of Equal Shares; home of Pabulib.

2021 **President**, Jagiellonian University PhD Students' Association

2020 **Plenipotentiary**, Polish Association of Doctoral Candidates

Research Visits

Northwestern University, University of Oxford, University of Chicago, Univeristy of Warsaw, TU Berlin, NUS.

Other Experience

2020 **Optimization Consultant**, PCG Academia
Integer linear programming models for real-world resource-allocation problems for a private-sector client.

Languages

Polish (native), English (fluent), French (conversational, actively improving), Spanish (intermediate).
