Summary. 5 journal articles and 28 full conference papers (of which 1 to appear), published mainly at the major AI conferences (AAAI, IJCAI, NeurIPS, AAMAS, EMNLP) and in *Artificial Intelligence*, *JAIR*, and *JCSS*. In addition, 1 position paper is available as a preprint.

Author ordering. As is customary in computational social choice, authors are usually listed alphabetically, so position in the author list does not reflect contribution. Papers that deviate from alphabetical order list the lead author first.

Conventions. My name is in bold. Journal versions of conference papers are listed separately and marked as such. Extended abstracts are not listed.
